

I am an enthusiastic, proactive and highly adaptable individual with a passion for problem solving challenges, learning and creating. Software/Web Development was an obvious path.

I work well within a team and as an individual, I am highly motivated with a strong work ethic and positive attitude. I am looking to secure a new role that will enable me to challenge and enhance my current skills and learn new ones.

My knowledge and experience in my previous workplaces will help me to adapt well and be utilised to best effect for the benefit of your organisation and our long term future.

## Accomplishments

**Website for car sales:**

A small project of creating a website with HTML, CSS and basic JS - <https://github.com/RemiHub/CJcars.git>
